DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over admitted prior art fig.3 in view of Hill (5,859,572).

Regarding claim 1, Admitted prior art fig.3 discloses a transceiver for inducing electric fields according to data to be transmitted in an electric field propagating medium, and carrying out at least data transmission by using induced electric fields, comprising: a transmission unit configured to modulate the data to be transmitted by generating alternating current signals having a prescribed frequency, and transmit modulated signals obtained by modulating the data to be transmitted (see admitted prior art element 503); a parasitic capacitance appearing between a ground for the transmission unit and an Earth ground and a parasitic capacitance appearing between the electric field propagating medium and the Earth Ground (see admitted prior art elements 43, 41, 51, 9, 53), except for a resonance causing unit. However, Hill discloses a transmitter arrangement for power specific impedances comprising a resonance-causing unit configured to cause a series resonance (see fig.1, element12).

Art Unit: 2683

Thus, it would have been obvious to one having ordinary skill in the art at the time the invention was made to use the Hill's resonance causing unit in admitted in order to increase in amplitude of an electric device.

Allowable Subject Matter

3. Claims 2-49 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
